

Note: please read the User's Guide carefully, before using this product. Please keep this manual properly, for future reference.

Brief Introduction

This remote control is widely used in access control, remote sensing & telemetry, security alarm devices, home automation, industrial control, motor switching control, motor forward and reverse remote controls, lighting control, LED lamp controllers, remote control electronic locks, curtain remote control, remote control of drying racks, home security remote control, wireless pager remote control switch, industrial control products, etc. Special function can be developed according to your requirements!

Indicator: red light as default

Buttons: 8 keys

Brief Introduction

- Model number: R-C01-K8A
- Frequency: 433MHz (other frequency points can be customized)
- Encoding method: 1527 learning code
- Period: $T = 1.60\text{ms}$
- Debugging method: ASK
- Transmitting power: 15dBm
- Working current: 12mA@12V
- Standby current: 1uA
- Power supply mode: 12V 23A battery (one piece)
- Communication distance: about 400 meters (transmission in open environment)
- Size: 110*37*15mm
- Weight: 60g
