

Note: please read the User's Guide carefully, before using this product. Please keep this manual properly, for future reference.

Overview

This wireless remote control enables remote operation of devices via radio frequency (RF) signals. It adopts 2.4G modulation and is widely used in fields such as new energy, photovoltaics, wBMS, smart city systems, smart homes, industrial control, and smart security. In addition to providing standardized products, customized services are available, including customized silk screening and Logo (with a certain MOQ).

Pairing Button: Key 1

Technical Parameters

- Model: R-F02-K62G4
- Frequency: 2.4GHz~2.5GHz
- Modulation: GFSK
- Transmission Power: 7dB (Conducted)
- Transmission Current: 8mA
- Power Supply: CR2032 Button Cell Battery
- Communication Range: Approx. 80 meters (open area)
- Weight: 23g
